

## @enterprise® - What's new in Version 7.0

### New Process Editor

Usability of the process editor has been greatly improved.

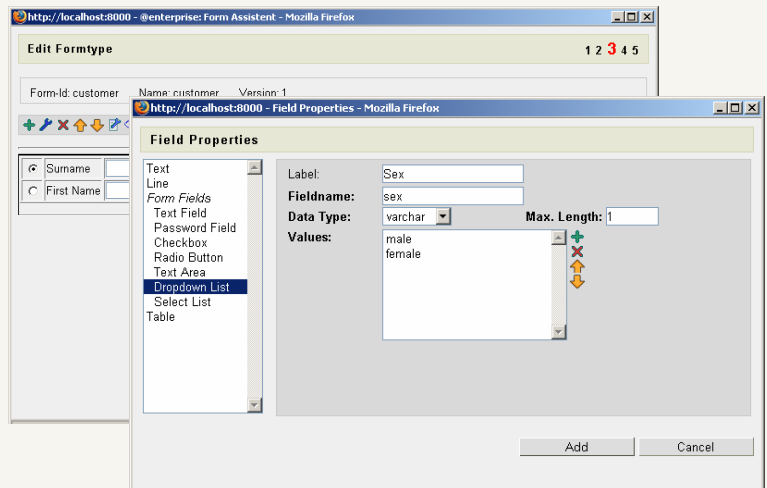

- ◆ Select regions
- ◆ Multiple undo/redo
- ◆ Cut/copy/paste of steps and regions
- ◆ Zooming
- ◆ Context menus
- ◆ Birds-eye-view
- ◆ Orthogonal routing
- ◆ Process annotations
- ◆ Direct creation of tasks and roles

### Form Wizard

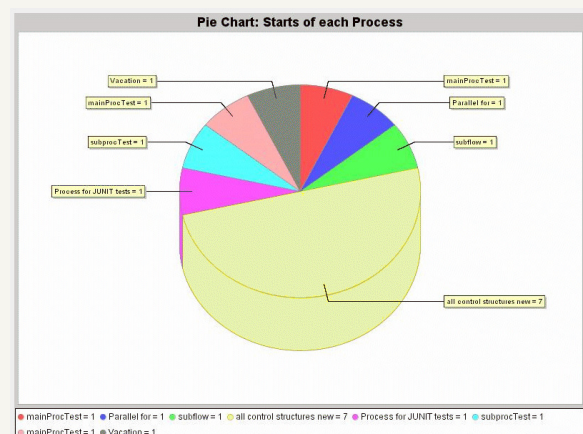

Forms for processes and documents can be created directly.

- ◆ References to other forms
- ◆ Subtables
- ◆ Various HTML elements
- ◆ Object and date selectors

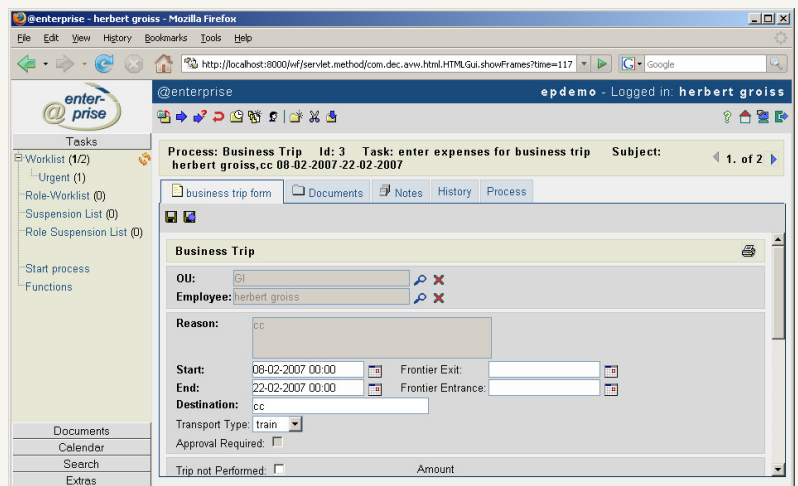

### Reporting

- ◆ Flexible and extensible data schema definition in XML
- ◆ Supports a variety of export formats:
  - ◆ HTML
  - ◆ Charts
  - ◆ Excel, csv
  - ◆ User-defined

## Worklist Client

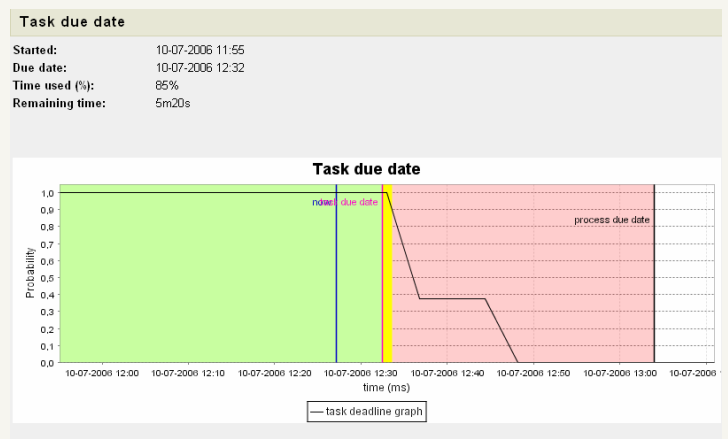

- ◆ Number of total and new entries are shown for each list.
- ◆ Users can structure their worklists by defining own folders and subfolders.
- ◆ Structured and streamlined display of work items. All aspects (forms, documents, notes, history, process definition) easily accessible via tabs.
- ◆ Changes on form data can be traced and displayed on a field level.

## Time Management

Time related process information can be captured and administrated.

- ◆ Forecasting process durations,
- ◆ early detection of potential deadline violations
- ◆ Comprehensive graphical display of time information

## Administration / Miscellaneous

- ◆ Class checker checks correct syntax, availability of class and method wherever Java classes or methods are referenced.
- ◆ Additional tab "Referenced by" shows where objects are referenced.
- ◆ Enhanced timer interval specifications (e.g. start every Wednesday and Friday a 3 a.m.)
- ◆ Hint when restart or cache refresh are necessary
- ◆ Integration of Web Services
